Latest Occupation:

Senior Consultant for User Experience Design at Deloitte Digital for 6+ years (From Nov 2014 till May 2021)

Roles and responsibilities:

- Identify business requirements, provide user centric design solution, management and functional design.
- Analyzing and designing user experience strategies for web, mobile platforms and multimedia applications.
- Develop interactive prototype, interaction design (including scenario creation, journey mapping), testing, training, define support and maintenance procedures.
- Collaborate with clients to advise, design, implement and deploy e-commerce and portal solutions.
- Working closely with the product management, development and visual design teams in an agile environment.
- Provide training to junior practitioners in the form of classroom sessions, workshops and mentoring.
- Contribute to recruitment for the hiring of other designers by participating on the interview panels.
- Collaborating with teams to deliver delightful, meaningful and useful digital experiences.

Prior Work Experience:

2013 till 2014 - UI / UX Developer at Capgemini India Pvt. Ltd.

Roles and responsibilities

- Interfacing with onsite/offsite teams for business requirements gathering, conducting system analysis and translating the client's business requirements into suitable design solutions, specific system, application and process designs.
- Handling the design, development and testing, troubleshooting and debugging process.
- Monitoring project progress as per scheduled deadlines for various tasks; taking necessary steps to ensure project completion within time.
- Maintaining close coordination between onsite and offsite teams for ensuring seamless delivery of the project as per scheduled timelines.
- Conducting sessions on user experience for web and mobile

2010 till 2013 - UI / UX Developer at Infosys Ltd.

Roles and responsibilities

- Accountable for requirement analysis, high level design, detail design preparation and application code development.
- For future use build reusable code and libraries.
- Ensure the technical feasibility of UI/UX designs.
- Follow coding standards, creating technical documents and group procedures individually and in teams.

- Providing critical support for testing and production support issues.

Education:

2010- Bachelors of Engineering in Electronics from Fr. Conceicao Rodrigues College of Engineering (University of Mumbai)

2007- Diploma in Electronics from Premilila Vithaldas Polytechnic, S.N.D.T University, Mumbai.

Awards & Recognition:

2019 - Applause Award (Deloitte Digital)

2018 - Spot Award (Deloitte Digital)

2017 - Applause Award (Deloitte Digital)

2015 - Applause Award (Deloitte Digital)

2014 - Spot Award (Deloitte Digital)

Hobbies:

I love creating oil paintings and ink illustrations. I also like reading books and watching documentaries. Recently I have newfound interest in eggless baking and experimenting with various recipes has become therapeutic for me.
